Summary

TommyTQL is a certified HUBZone small business located in the state of Washington. We tailor our solutions to organizations and enterprises of any size and scope. Since we primarily focus on the public sector, we have deep knowledge of procurement laws, best practices and contract vehicles available at the local, state and federal level.

We are instilled with the idea of developing & implementing technology solutions that will improve our client's efficiency, security, reliability & productivity while maintaining a fair and competitive price for all our services and solutions.

Our core strengths are focused on the hybrid cloud computing environment. We have strong relationships with all of the major technology distributors (Carahsoft, TD Synnex, Arrow) along with large established lines of credit to make the ordering process smooth and seamless for any transaction size. We also achieved advanced partner levels with manufacturers such as IBM, Adobe, Google and Microsoft. This provides us with better technical and account management resources directly from the manufacturers.

Business Summary

Established in 2018, TommyTQL is a National IT Solutions Provider and an experienced Value Added Reseller (VAR). We bring you products and solutions from some of the most innovative companies like Google, Microsoft, IBM, HPE, Dell, Broadcom, Adobe, Eaton, and many other leading manufacturers in the technology arena at competitive pricing.

Capabilities / Expertise

With 25 years of industry experience and expertise under our belt, we are dedicated to finding our clients the right solutions that will be tailored to their specific business needs. Our diverse team of experienced sales and engineering resources are available to help with projects of any size and scope. We have teaming agreements that allow us to provide a large variety of products and services through common contract vehicles such as GSA, NASPO, OMNIA EQUALIS and NCPA. Since our inception, we have successfully won and completed over 200 contracts in the public sector.
